* Certified Technicians are issued photo identification cards by the Water Authority for customer assurance.

Certified Technicians have completed a training course administered by the Water Authority and are required to:

- Maintain certification through continuing education courses.
- Enter Service Reports utilizing WAC's online reporting system, from which they can email to customer.
- Carry out all works in accordance with manufacturer and Water Authority guidelines.
- Carry out works in a manner protective of personal and public health and safety.
- Notify the Water Authority regarding any system left inoperable.
