

CAREER OPPORTUNITY

Water Authority - Cayman

Invites applications for the post of

Engineer-Water Production

The successful candidate will troubleshoot and provide operational assistance for the Authority's existing seawater reverse osmosis (SWRO) plants. He/she will also be responsible for the engineering design of and cost estimates for new RO plants and related capital improvement projects.

JOB REQUIREMENTS:

- A Bachelor's Degree in Engineering (Mechanical, Civil, or similar) and an internationally recognized professional engineering qualification.
- Minimum 3 years relevant post-graduate engineering experience, including the design and/or operation of SWRO plants with water production capacities exceeding 250,000 gpd.
- Good working knowledge of and experience with the installation of mechanical and electrical equipment typically used with water infrastructure, i.e., pumps, blowers, valves, electrical controls etc.
- Excellent computer skills with proficiency in Microsoft Office Suite and AutoCAD; and familiarity with basic general programming, PLC programming and SCADA systems.
- Good communication skills, including technical writing and interpersonal communication skills.
- Must be self-motivated, energetic, detail-oriented, and able to work with minimum supervision.
- Must be physically able to lift moderately heavy items.

The Water Authority offers competitive salaries, an international medical insurance plan, pension plan and generous vacation benefits. The minimum to mid-salary range for this post is CI\$79,100 - \$98,880 per annum.
