

## CAREER OPPORTUNITY

### *Water Authority - Cayman* **Engineer-Water Production**

The successful candidate will troubleshoot and provide operational assistance for the Authority's existing seawater reverse osmosis (SWRO) plants. They will also be responsible for the engineering design of and cost estimates for new RO plants and related capital improvement projects.

#### **JOB REQUIREMENTS:**

- A Bachelor's Degree in Engineering (Mechanical, Civil, or similar) and an internationally recognized professional engineering qualification.
- Minimum 3 years relevant post-graduate engineering experience, including the design and/or operation of SWRO plants with water production capacities exceeding 250,000 gpd.
- Good working knowledge of and experience with the installation of mechanical and electrical equipment typically used with water infrastructure, i.e., pumps, blowers, valves, electrical controls etc.
- Excellent computer skills with proficiency in Microsoft Office Suite and AutoCAD; and familiarity with basic general programming, PLC programming and SCADA systems.
- Good communication skills, including technical writing and interpersonal communication skills.
- Be responsible, detail-oriented, able to work with minimum supervision and be physically fit.

The Water Authority offers competitive benefits, including comprehensive health insurance, a choice of pension plan, and a generous leave package. The starting salary range \$84,720–\$105,900 per annum. This is a full time and permanent role and hours of work are 37.5 hours per week, Monday - Friday
